

Activity: Categories and category combinations

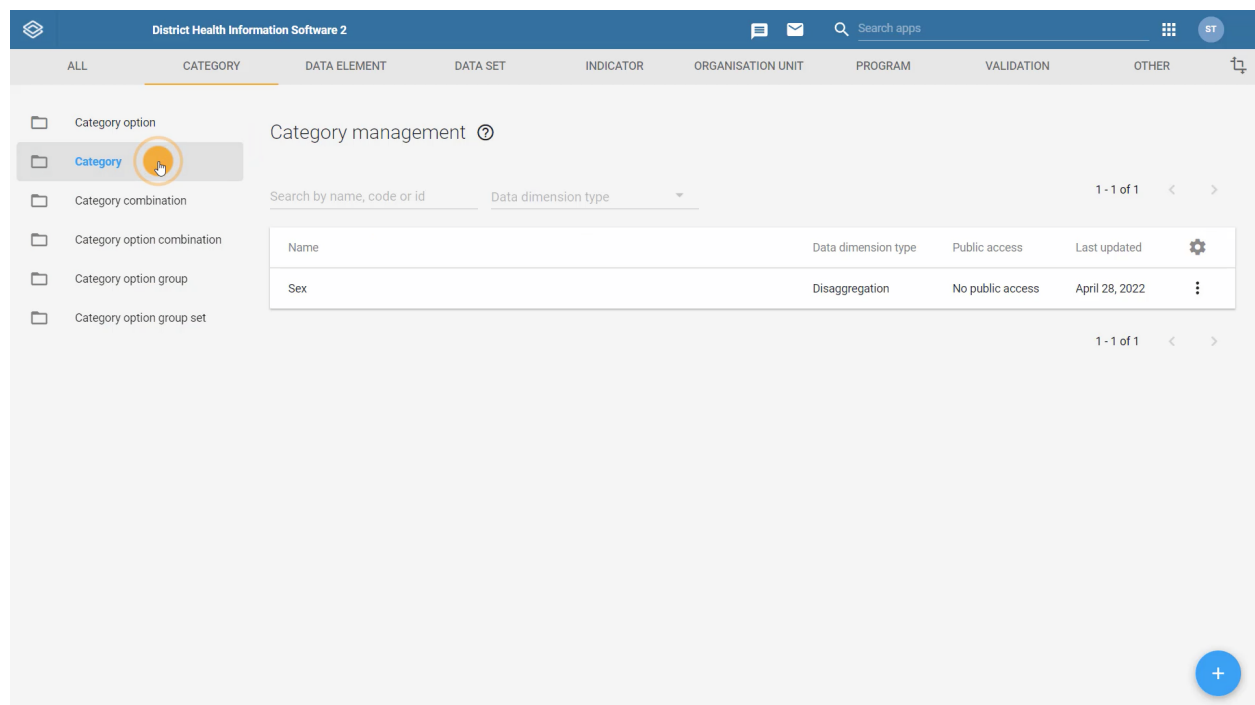

Overview

In this activity, you will create the category “Age (RMNCAH)” and add the three age category options that you created in the previous activity. After that, you will create two category combinations, a category combination with a single category “Age (RMNCAH)” and a category combination of “Age (RMNCAH) & Sex”.

Instructions

Create the Category: Age (RMNCAH)

1. Sign in to your account in **DHIS2 Customization Practice**
2. Open the **Maintenance application**
3. Navigate to the **category management page**

4. Make sure the category you are about to create doesn't already exist in the system
5. Click on the **blue plus (+) sign** on the bottom right
6. Fill in the fields:

- a. **Name:** Age (RMNCAH)
 - b. **Short name:** Age (RMNCAH)
 - c. **Data dimension type:** Disaggregation
7. Leave the **data dimension box** selected
8. Select the three **category options: 10-14 years, 15-19 years, 20+ years**
 - a. Move them to the selected items box
9. **Arrange the order** of the category options in the selected box in the ascending order

The screenshot shows the 'Category Management' interface in DHIS2. The 'Data dimension type' is set to 'Disaggregation'. The 'Data dimension' checkbox is checked. The 'Category options' section shows a search bar and two lists: 'Available items' (Female, Male) and 'Selected items' (10-14 Years, 15-19 Years, 20+ Years). The '20+ Years' item is highlighted in the selected list. Buttons for 'ASSIGN ALL 2', 'REMOVE ALL 3', 'SAVE', and 'CANCEL' are visible.

10. Click 'Save'

The category **"Sex"** is already in the system so you don't need to create it again.

Create a Category Combination: Age (RMNCAH)

1. Navigate to the **category combination management page**
2. Click on the **blue plus (+) sign button** on the bottom right
3. Fill in the fields:
 - a. **Name:** Age (RMNCAH)
 - b. **Data dimension type:** Disaggregation
4. Select the **category: Age (RMNCAH)**
 - a. Move it to the selected items box

5. Click **'Save'**

Create a Category Combination: Age (RMNCAH) & Sex

1. Navigate to the **category combination management page**
2. Click on the **blue plus (+) sign** on the bottom right
3. Fill in the fields:
 - a. **Name:** Age (RMNCAH) & Sex
 - b. **Data dimension type:** Disaggregation
4. Select the categories: **Age (RMNCAH)** and **Sex**
 - a. Move them to the selected items box
5. Click **'Save'**

Now you have created the categories and category combinations used in the RMNCAH data set.
