

Activity: Creating an organisation unit groupset

Overview

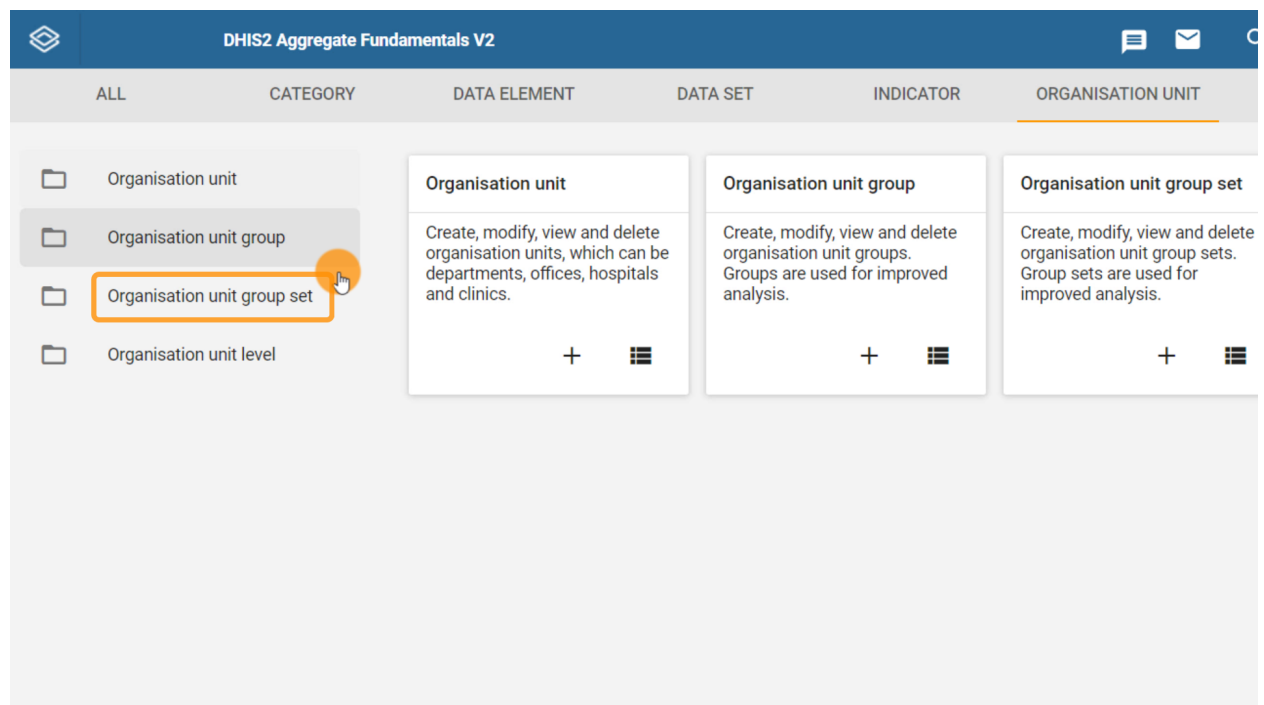

In this activity, you will create an organisation unit group set, Facility Type, and add the organisation unit groups you have created in the previous exercise.

Before starting this activity, you need to have completed the previous activity and created two organisation unit groups: Hospital and Health Center. If you haven't created those, please go back to the previous unit.

Instructions

Create an organisation unit group set: Facility Type

1. Sign in to your account in **DHIS2 Customization Practice**
2. Open the **Maintenance application**
3. Navigate to the **organisation unit** tab on the top of the page

4. Select the **organisation unit group set** page in the left menu
5. Click on the **blue plus (+) sign** on the bottom right
6. Fill in the fields:
 - a. **Name:** Facility Type
 - b. **Code:** FT
 - c. **Description** (Optional): Each group represents a type of facility
7. Leave the “**Data dimension**” check box selected
8. **Organisation units:** In the organisation unit group selection box, double-click on the groups “**Health Center**” and “**Hospital**” in the available list to add them to the group set
9. Click ‘**Save**’
