

## Activity: Change a default form data set into a section form data set

In this activity, you will edit the default data set you created in previous activity from a default form to a section form.

### Instructions

Add in sections to your RMNCAH data set

1. Sign into your account in **DHIS2 Customization Practice**
2. Open the **Maintenance application**
3. Select the **data set tab** and choose data set from the left menu
4. Find your *Your initials*\_RMNCAH data set in the list of available data sets
5. Click on the **actions menu** and select 'Manage sections'

6. To add a new section, click on the **blue plus (+) sign**
7. Enter the **name of the section: Antenatal Care**
8. **Assign the data elements** to the form:
  - a. ANC 1st visit
  - b. ANC 4th visit
  - c. ANC 8th or more visit
9. Arrange their order to match the data collection form. Click on the data element you wish to move and use arrows to move it up and down in the selected box

## Antenatal Care

	Value
Antenatal care 1st visit	
Antenatal care 4th visit	
Antenatal care 8th or more visit	

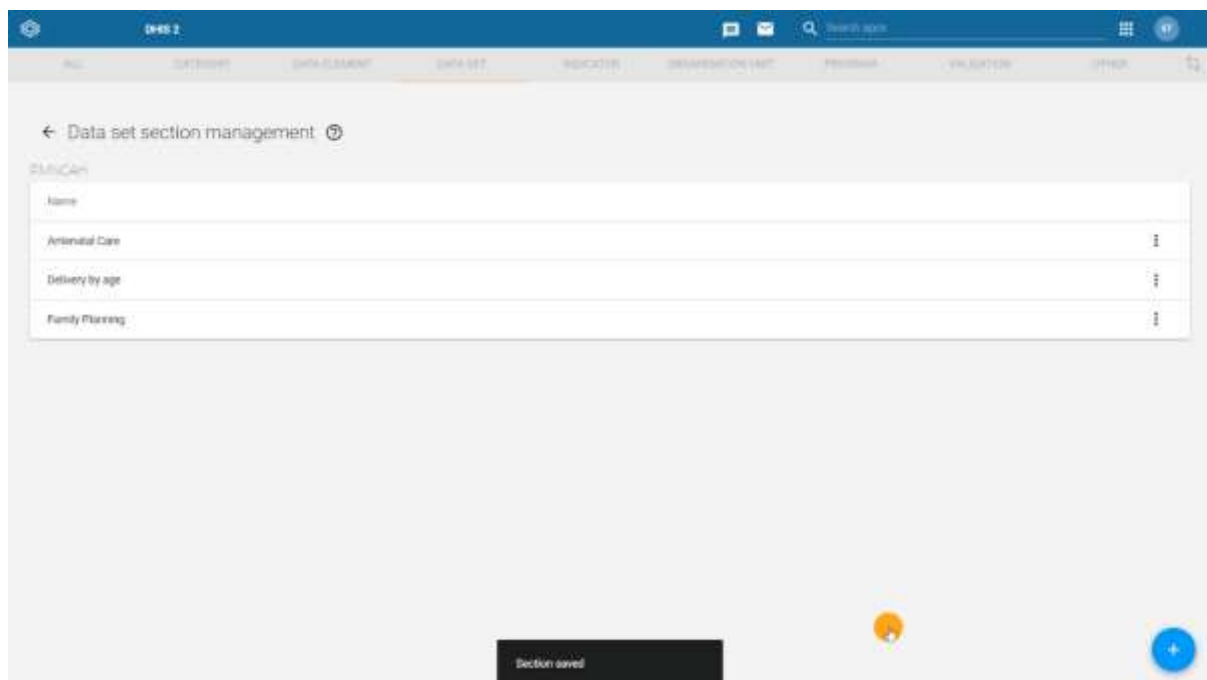

## Delivery by Age

	10-14 Years	15-19 Years	20+ Years
Delivery in facility			
Delivery in facility by caesarean section			

## Family Planning

	10-14 Years		15-19 Years		20+ Years	
	Male	Female	Male	Female	Male	Female
Contraception first time users						

11. Click 'Save'
12. Repeat this process and create two more sections:
  - a. Delivery by Age
  - b. Family Planning

Now you have successfully created a section form.

Note that at the moment neither you or any other user wouldn't be able to enter data into the data set in the data entry application because the data sets are created automatically with no public access. In the next section, you will learn how to change the sharing settings for users to be able capture data in the data set.
