

Activity: Creating indicator groups and group sets

In this activity, you will create the indicator group “RMNCAH - Maternal and Newborn Health” and create the indicator group set “RMNCAH”. You will assign the newly created indicator group to the group set.

Instructions

Create the indicator group: RMNCAH - Maternal and Newborn Health

1. Sign in to your account in **DHIS2 Indicators Practice**
2. Open the **Maintenance application**
3. Select the **indicators tab**
4. Click on indicator group in the left side menu to take you to the **indicator group management page**
5. To create a new indicator group, click on the **blue plus (+) sign** on the bottom right
6. Fill in the fields:
 - a. **Name:** RMNCAH - Antenatal care
7. **Add the indicators**
 - a. Search for “ANC” in the search field
 - b. Move all ANC associated indicators to the selected box
8. Click **‘Save’**

The group will now be available in to use in the analytics applications

Create the indicator group set: RMNCAH

1. In the **Maintenance app**, select **the indicators tab**
2. Click on indicator group set in the left side menu to take you to the **indicator group set management page**
3. To create a new indicator group set, click on the **blue plus (+) sign** on the bottom right
4. Fill in the fields:
 - a. **Name:** RMNCAH
5. **Add the indicator groups:**
 - a. RMNCAH - Antenatal care
 - b. RMNCAH - Maternal and newborn health

This group set will now appear in the Maintenance application, where you can use it to manage the indicator groups it contains.
