

Activity - Creating data elements

In this activity, you will create a data element: RMNCAH - ANC 1st visit.

Instructions

Create a data element: *Your initials*_RMNCAH - ANC 1st visit

1. Sign in to your account in **DHIS2 Customization Practice**
2. Navigate to the **data element management page**

3. Click on the **blue plus (+) sign** on the bottom right
4. Fill in the fields:
 - a. **Name:** *Your initials*_RMNCAH - ANC 1st visit
 - b. **Short name:** *Your initials*_ANC1
 - c. **Form name:** ANC 1st visit
 - d. **Domain type:** Aggregate
 - e. **Value type:** Positive or Zero Integer
 - f. **Aggregation type:** Sum
 - g. **Category combination:** None
5. Click **'Save'**

Now you have successfully created your first data element. The other data elements from the Antenatal section, as well from the other sections of the RMNCAH dataset are already in the system so you don't have to create those.
