Activity - Creating category options

Database Link - Documentation - Printable Version

Overview

In this activity, you will create the three category options (10-14 years, 15-19 years, 20+ years) that make up the age disaggregation for the RMNCAH data set and the two category options (Male and Female) that make up the sex disaggregation.

Instructions

Create the **category options for RMNCAH age disaggregations**

Create the category option: *Your initials_10-14 years*

1. Sign in to your account in **DHIS2 Customization Practice**
2. Open the **Maintenance application**
3. Select the **category** tab
4. Click on the **category option** in the left menu to navigate to the **category option management page**

5.   **Review the existing categories** and make sure the category you are about the create doesn't already exist in the database

    The categories **"Male"** and **"Female" are already in the system**, you don't need to create them again. All the age related disaggregations need to be added.

6.   Click on the **blue plus (+) sign** on the bottom right to create a new category option

7.   Fill in the field:
        a.**Name:** *Your initials_10-14 years*

8. Click **'Save'**

Create the category option: *Your initials_***15-19 years**

1. From the **category option management page**
2. Click on the **blue plus (+) sign** on the bottom right to create a new category option
3. Fill in the field:
a. **Name:** 15-19 years
4. Click **'Save'**

Create the category option: *Your initials_***20+ years**

1. From the **category option management page**
2. Click on the **blue plus (+) sign** on the bottom right to create a new category option
3. Fill in the field
a. **Name:** *Your initials_*20+ years
4. Click **'Save'**

You have now created all the category options that are used in the RMNCAH data set.
